

MpX v3 – new program generation from Kongsberg Target Systems

Kongsberg Targets Systems introduce MpX v3, a new generation software to be used with our electronic shooting targets

What's new?

- 🎯 **Pegasus** - new competition management system (replaces Orion)
- 🎯 **SDU-3** - new central unit with increased speed and capacity
- 🎯 **WinGPS Cloud** - new user interface and real time Internet presentation

Pegasus

SDU-3

WinGPS Cloud

Do we need to upgrade?

- 🎯 **Yes, if you want a significant speed increase in your shooting range system**
- 🎯 **Yes, if you want increased handling flexibility during competitions**
- 🎯 **Yes, if you want real time Internet presentation with automatic setup**
- 🎯 **No, if you are satisfied with today's system. Orion and all other software components will be continuously supported**

MpX v3 – new program generation from Kongsberg Target Systems

Pegasus applies to ISSF-definitions, and has these new functionalities:

- Supports up to 3 target lines from the same firing line
- Different shooting programs can be run simultaneously in match mode
- «Free start» - possible individual control of each target
- Easy to use combining match mode and training mode
- Target definitions and caliber to be defined from Pegasus and/or the shooter`s monitor
- Reshooting and shoot-off functionality for pistol and ISSF-finals
- Significant increased speed of operations during matches (change series etc.)
- New and improved integrated database
- Improved maintenance functions – shot counters, advanced system check, sensor status, calibration....
- Possible to get shot simulation from targets (dependent of target electronics HW/SW version)
- Printout now also in training mode
- Your own shooting programs remains after upgrade
- Full screen – Flexible and adjustable view
- Wide selection of official shooting programs (ISSF)
- Handles up to 100 target definitions – (dependent of monitor version and type)

SDU-3 – New high capacity central unit

- Simple upgrade using USB memory stick
- Simple installation (equal cables and connectors as previous versions)
- Significant increase of capacity and memory
- USB cable directly from SDU-3 to Pegasus PC

WinGPS Cloud - New automatic solution for real time presentation

- Automatic setup for real time Internet presentation
- Portal showing active matches – just click to follow
- User selectable shooter targets to follow – multiple per view
- Real time presentation
- Any Internet connected PC/Mac/Smartphone/tablet etc. can be used

Upgrade pricing: Contact KTS or local representative

Notes: Pegasus requires SDU-3 (SDU-1 and SDU-2 can not be used)

WinGPS Cloud requires Pegasus

WinGPS Cloud service annual fee for Web publishing:

1-30 lanes price: Contact KTS or local representative

31-99 lanes price: Contact KTS or local representative

100+ lanes price: Contact KTS or local representative

Pegasus PC req.:

- **Windows versjon**
Windows 7 / 8 / 10
- **Recommended screen res.**
1280 x 720 or higher
